Seeking work opportunities in the field of computer science to apply and enhance my knowledge and skills while contributing to innovative projects.

EDUCATION

BSc Computer Science

2023 - CURRENT

3rd year student at Bar-Ilan, Expected graduation : Q3 2025

PROJECTS:

Foo-Tube - Developer

2024

Foo-Tube is a YouTube clone aiming to imitate YouTube in behavior & look, the purpose of building the project is gaining experience in building a web application, including both backend and frontend.

Key Responsibilities:

- **Project planning:** Led the project from conception through deployment, coordinating with a team of 3 developers.
- **Backend Development:** Designed and implemented the backend using Node.js and Express.
- **Frontend Development:** Utilized React.js for a dynamic and responsive user interface.
- **Database Management:** Managed a MongoDB database for storing product and user information.

Achievements:

- **Server and Database Development:** Developed the server and database independently, ensuring efficient data handling and security.
- **UI Development:** Created the following pages for the web app: video, home, search, user profile, signup, login.
- **Styling:** Stylized the entire application to provide a cohesive and user-friendly interface.

Technologies Used:

- **Frontend:** React.js, HTML5, CSS3
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Project Development and planning:** GitHub and Jira
